wikiHow to Hold a Ukulele

How to get a clear, articulated strum

- **Posture:** How to hold your hand

Your index fingernail always faces the floor and the pad of your finger faces up. If you allow yourself to strum with the side of your finger, you will soon be saying ‘Ouch’.

- **Path:** How your hand moves thru the air
    - Shake the drop of paint off the end of your index finger
- **Position**: Where does your finger strum the strings
    - Between 12th and 15th fret bar
- **Pressure:** How hard do you strum the strings
    - The faster you strum, the lighter the touch
